CEO'S REPORT FOR OCTOBER

In **India**, **COVID-19** toll has gone up, it was certain as we all know India is the country of approx 138 **crore which** is a huge number if we consider geographical area, the only solace is that the recovery rate is good. In spite of the rise in the number of Coronavirus victims, hospitalization has reduced as patients **prefer** to home quarantine.

As per Indian statistics, in a population of every 10 lakhs (1 million) 5000 cases are infected with Coronavirus and the death rate is around 83.

It is commendable on the part of DIR-India's medical team that the residents in Janta **Colony**, **Nayagaon**, Punjab which is a crowded basti is free from COVID-19 suffering as of date.

Can & Will Foundation donated 950 packs of Milk and Glucose biscuits. We are indebted to all donors for their endowment which benefitted all kids and pregnant women who come to DIR-India for their health check up were given those packets of happiness as parting gifts.

Ma Foundation adopted five more underprivileged families with famished children in this month. They **sent funds** to the DIR account to support 12 families with undernourished children for one year. Our special thanks and compliments to Mrs. Geeta the founder and chairperson of Ma Foundation.

Swachh **Bharat Abhiyan** is the nationwide drive. DIR-India and Oorjaa organization doled out steel dustbin to 145 families of Janta Colony. It is a motivation incentive to change the outlook of the residents of the basti and guide them to keep the environment clean and healthy for the good living standard.

We are indebted to Dr. Madhu Khullar who has financed the cost of books for all four students who got admission in St. Stephens School this year. It is heartening to see the online results of all four students was 90% and above in the first unit test held in September 2020.

Mr. Ravinder Jain and Rani Jain, a business family, visited DIR-India's Basti office. They both were galvanized by the functioning of the organization. They donated money for feeding 130 children of Basti on 29th October 2020. A grand feast was cooked by a professional Cook along with assistance offered by the entire team of DIR-India. The food was delicious as it was cooked with great devotion by the dedicated volunteers.

102 Not Out

There is a measly 5.6% chance of a woman living till 100. To live beyond that, Almost unheard-of. Bimro Devi proved that can be on the cards. 102. Born and brought up in Himachal Pradesh, she had a fruitful life there. After her marriage, she shifted to Punjab with her husband. Unfortunately, her husband passed away in 1972, from a paralysis attack. She has been living for the past 48 years alone. They had 4 children, one daughter and 3 sons. Unfortunately, the daughter passed away due to some chronic illness.

Two of her sons live with their wives and children separately leaving behind her mother alone. When asked about their contribution to helping their mother, Bimro Devi got visibly upset and told us that they didn't help in any way in shape or form as they say that it isn't their duty. She was deeply disturbed by their actions towards her and wished not to reunite with them.

One of her sons, Naresh, 61, lives with her and takes care of her. He works as a sewage cleaner commonly known as “Jamadar” and has taken on full responsibility for his mother. He was married but is now separated. His wife and in-laws have been trying to force him to give all his savings and income to her and to just to leave the mother on her own. Having compassion and love for his mother, he refused and is currently living with his mother in a single room. His wife and in-laws are still hounding him for his money. Naresh knows that his mother is old, with no source of income or help. He refuses to abandon her as his brothers did.

Bimro Devi has very poor vision and even worse hearing capabilities. She cannot walk more than 5 steps without her body giving up. Naresh is the single source of income in the family, of which a significant percentage goes towards medical bills. The rest is used for upkeep and other uses.

DIR India, with the help of Ma foundation, has been taking care of Bimro Devi and her son during these tough times. We have been providing them with regular groceries and medical checkups.

MEDICAL TRAINING

Dr. Sakshi Sharma (BDS, MPH) joined DIR-INDIA on 12th October 2020 as a Public Health Doctor. Medical classes of the health promoters on the topics of Crimean Congo Hemorrhagic Fever and fetal development in each trimester of pregnancy were taught.

Revision classes on ectopic pregnancy, scabies and anemia were covered.

A class test was taken on the 28th October 2020

NUTRITION TRAINING

Dietitian Swati took a demonstration on COLORFUL Rava idlis made with seasonal vegetables keeping nutrition in mind. The main objective was to serve the combination of taste with nutrition. Veg Rava idlis is an idli variant that is made with an interesting combination of roasted semolina, spices, and fresh vegetables. This South Indian recipe can be given in a kid's lunch box, served during breakfast, or as an after-school snack in the evening. The steam-cooked traditional dish has a sufficient amount of flavor, soft texture, and packed with essential nutrients that make it a complete meal. Usually served with sambar, chutney, or even plain dal. The delicious vegetable Rava idlis can be made instantly at home. It is one of the most popular meals amongst children as they are excited from the shape, color and presentation.

Date of the nutritional demo: 20th OCTOBER 2020

Name of the dish: COLORFUL INSTANT RAVA IDLIS

Nutritional value per idli : Calories - 140 , Protein: 5 gms approximately

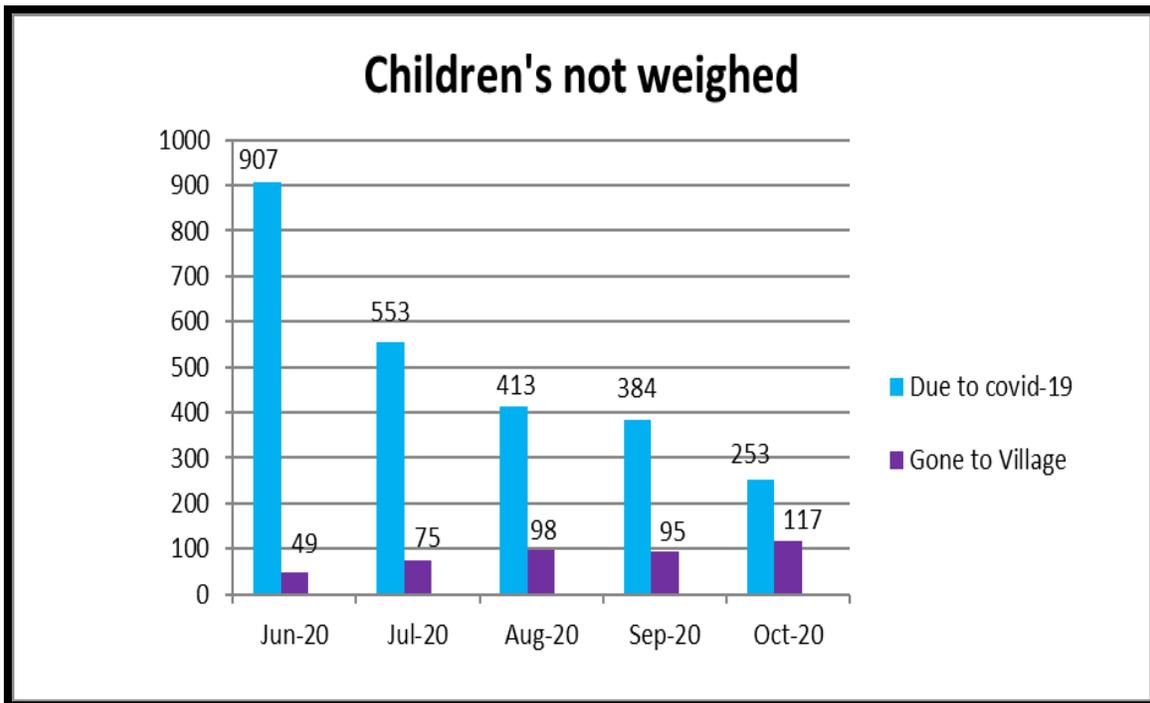

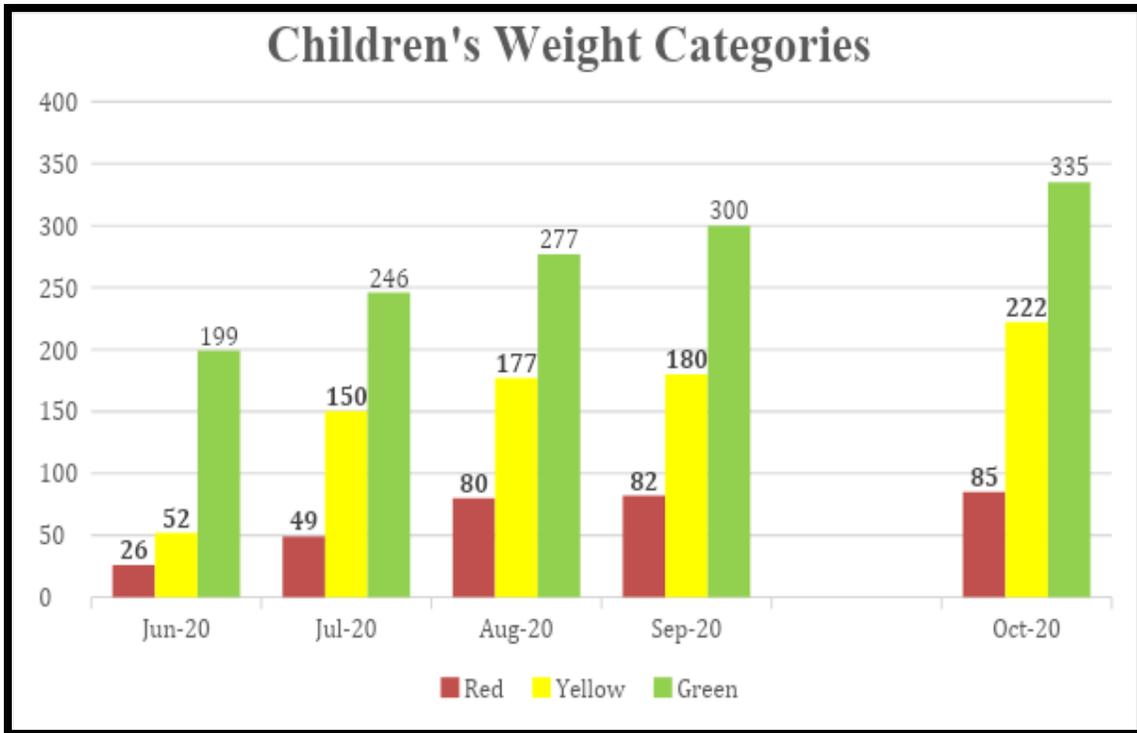

STATISTICS OF RED ZONE CHILDREN

Age (Months)	# Children	%
